

Alberto González

Staff Software Architect | Go & .NET | Distributed Systems | Cloud Platforms

Guadalajara, Mexico | +52 3311134059 | alresave@gmail.com

Executive Summary

Software Architect and Senior Backend Engineer with over 20 years of experience designing and scaling distributed systems, cloud-native architectures, and enterprise backend platforms. Expert in Go and .NET ecosystem, specializing in API architecture, microservices, and enterprise integrations including Salesforce and Oracle environments. Proven ability to define technical vision, modernize legacy systems, and deliver resilient, scalable backend platforms supporting mission-critical workloads.

Architectural Impact

- 1 Designed and deployed scalable Go microservices architectures supporting enterprise applications.
- 2 Led backend modernization initiatives transforming monolithic systems into distributed architectures.
- 3 Defined API architecture patterns and backend platform standards improving system scalability.
- 4 Implemented enterprise integrations across Salesforce, Oracle, and distributed backend services.
- 5 Improved backend reliability, performance, and maintainability across production systems.
- 6 Provided architectural leadership and technical guidance to engineering teams.

Professional Experience

Senior Backend Engineer — Jobsity / McGraw-Hill Education (2022–2025)

- 1 Architected scalable Go microservices supporting enterprise-scale platforms.
- 2 Designed backend API ecosystems consumed by internal and external systems.
- 3 Improved performance, scalability, and reliability of distributed backend systems.
- 4 Contributed to architectural planning and backend platform evolution.

Senior Software Engineer / Architect — Asinpa (2012–2022)

- 1 Designed distributed backend systems using Go and .NET microservices.
- 2 Led architecture and modernization of enterprise backend platforms.
- 3 Implemented integrations with enterprise systems including Salesforce and Oracle.
- 4 Provided architectural leadership and engineering guidance.

Software Engineer — Various Companies (2001–2012)

- 1 Developed enterprise backend systems using .NET and integration technologies.
- 2 Designed scalable backend services supporting business-critical applications.
- 3 Maintained and improved enterprise software platforms.

Technical Expertise

Languages	Go, C#, .NET Core, Java, JavaScript, TypeScript
-----------	---

Architecture	Microservices, Distributed Systems, API Design
Cloud Platforms	AWS, Azure, Docker, Kubernetes, CI/CD
Data	PostgreSQL, SQL Server, MySQL, Redis, MongoDB
Enterprise	Salesforce, Oracle, ERP integrations
Practices	System Design, Architecture, Agile, TDD

Education

Bachelor's Degree in Software Engineering
Instituto L. E. Williams, Guadalajara, Mexico
